<u>Coho</u>	<u>7/20/86</u>	<u>good substrate present</u>	<u>X</u>	

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Abundant rearing coho were observed in this stream. The flow and substrate also appeared quite suitable for coho spawning. The mainstem boundary for coho utilization needs to be moved upstream to this tributary also.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
